Other Nuheat Floor Warming Solutions

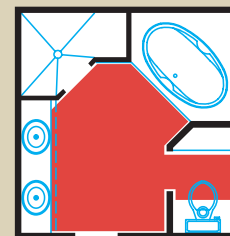

Pre-built like an electric blanket, Nuheat Mats (standard and custom mats) are the easiest floor warming systems to install. Thin heating wires are evenly spaced and embedded between two layers of durable fabric. Simply adhere the Nuheat Mat to the sub-floor using thinset and install your tile, stone, marble or laminate/engineered wood floors directly on top.

There are over sixty standard mat sizes (square and rectangular shapes) that fit most room applications. For spaces with curves or angles, we manufacture custom mats that are made to fit any room design. For more information, visit www.nuheat.com.

Nuheat Standard Mat

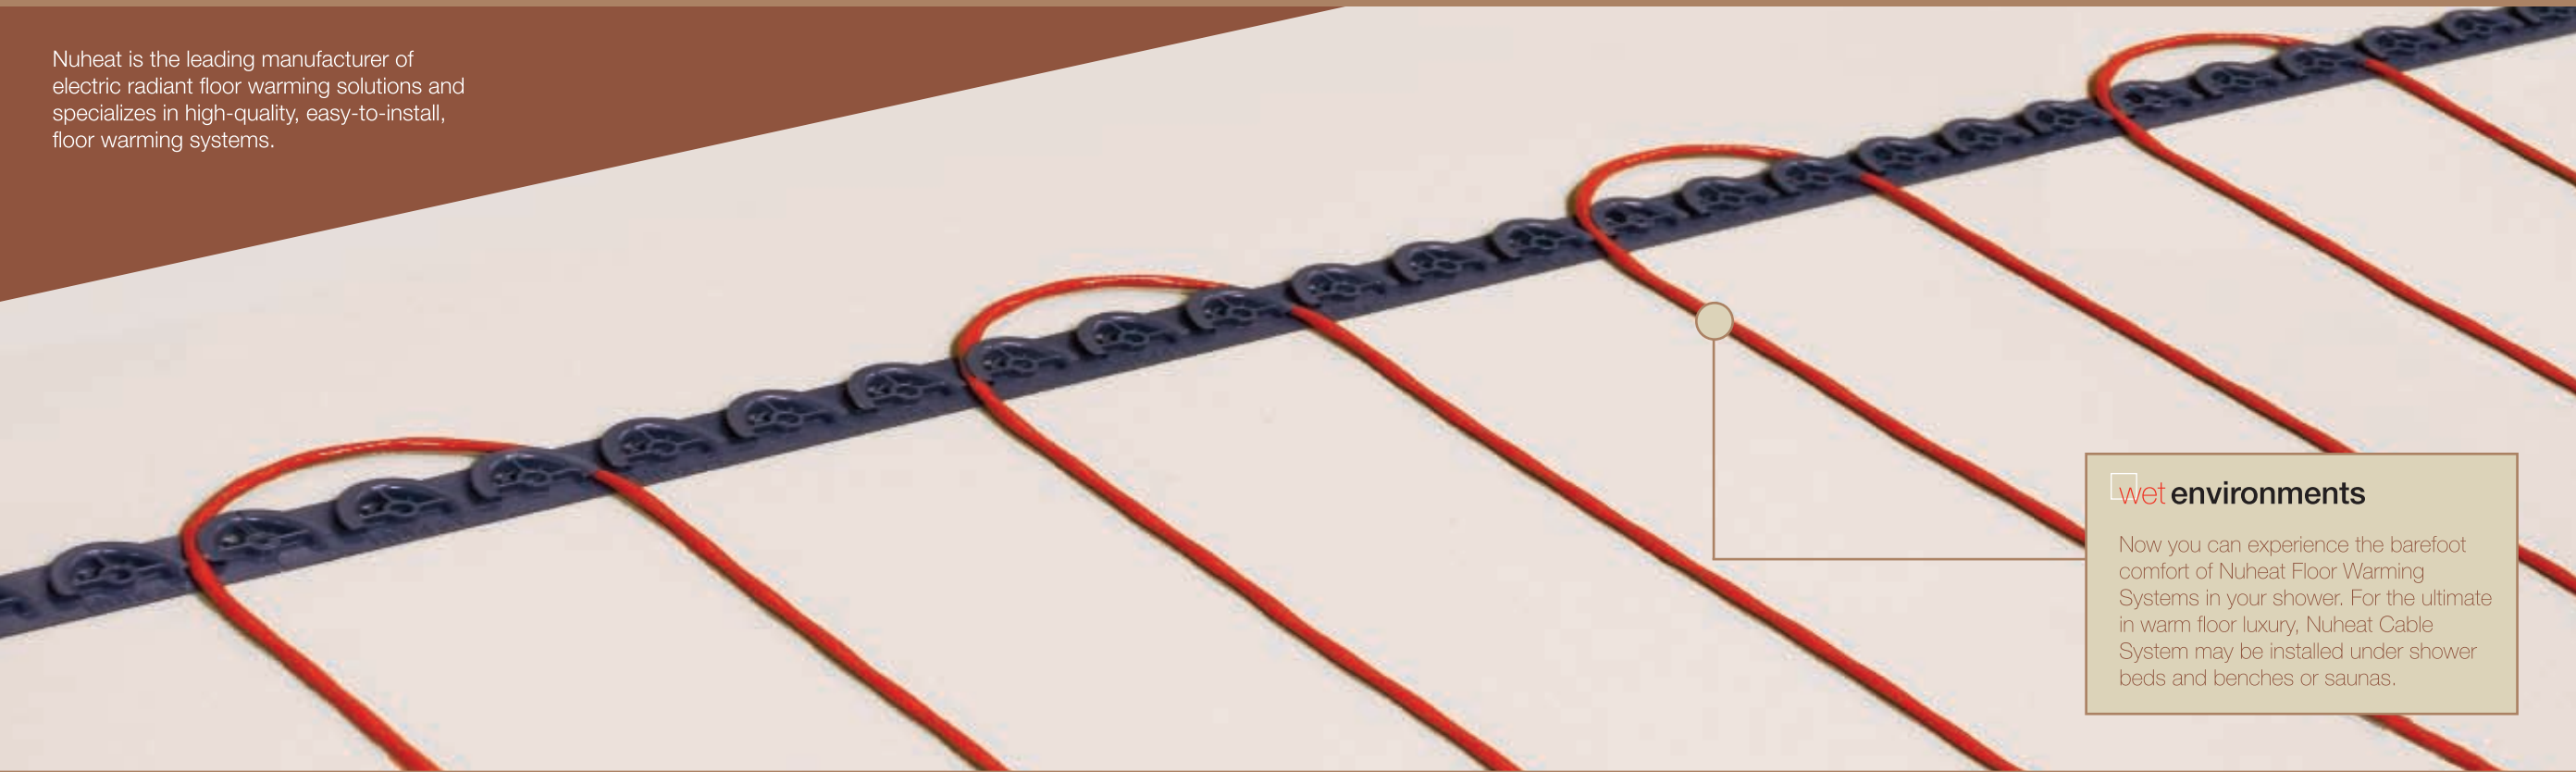

Nuheat Custom Mat

Floor Warming Systems

nuheatcablesystem

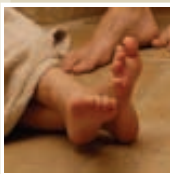

Nuheat is the leading manufacturer of electric radiant floor warming solutions and specializes in high-quality, easy-to-install, floor warming systems.

wet environments

Now you can experience the barefoot comfort of Nuheat Floor Warming Systems in your shower. For the ultimate in warm floor luxury, Nuheat Cable System may be installed under shower beds and benches or saunas.

product overview

Nuheat, the premier manufacturer of easy-to-install electric floor warming systems, introduces its latest floor warming solution, Nuheat Cable System.

Nuheat Cable System offers the ultimate in installation flexibility. Contractors can make on-site adjustments to the floor warming coverage for any room including those with curves and angles. Available in both 120V and 240V, the Nuheat Cable System is only 3/16" thick making it ideal for both remodeling and new construction projects.

A direct manufacturer's sales force, a technical services department and a full-time design team are part of Nuheat's superior customer service.

cable installation

1

Step 1: Install the Nuheat Cable Guides and Nuheat Cable onto a clean subfloor.

2

Step 2: Apply self-leveling compound and allow time to set.

3

Step 3: Install flooring according to manufacturer's instructions.

thermostat options

Harmony Thermostat

- Flush mounts behind a double-gang faceplate
- Floor sensing thermostat for tile, stone laminate/engineered wood floors
- Programmable 7-day settings
- Energy efficient
- Built-in Class A GFCI

Solo Thermostat — Available in 2009!

- Floor sensing thermostat for tile, stone laminate/engineered wood floors
- Dual Voltage (120V & 240V)
- Programmable 7-day settings
- ENERGY STAR qualified
- Built-in Class A GFCI

MatComfort & 82F Thermostats

- MatComfort used for tile and stone
- 82F used for laminate/engineered wood floors
- Programmable 7-day settings
- ENERGY STAR qualified
- Built-in Class A GFCI

Non-Programmable Thermostat

- Digital temperature displays
- Backlit display
- Built-in Class A GFCI

Regulator Thermostat

- Heating indicator light
- Power dial
- Built-in Class A GFCI
